PRESCRIPTION AND REMARKS.

"*Great Island, the westernmost of the two Sarangani Islands, is the larger, higher land best cultivated and the most fertile, which averages sometimes is covered by an elevation of 517 feet; seen from the west it appears between two peaks. Near the southwest point there is another volcano and in the southeast part a hill 1085 feet high. The north and east coasts are bordered by a reef which in some places extends out 2 or 3 miles, while on the south and west sides the fringing reef does not extend to any distance. The highest point is about 40 feet high.*"
